

Atanasoft® Announces Availability of AtanaSuite® 2008

Ames, IA – September 28th, 2007 - Atanasoft today announced availability of the **AtanaSuite 2008** family of products with many new enhancements including **AtanaSuite Active Server** support and Microsoft .NET 2.0 support.

AtanaSuite 2008 is the world's most advanced suite of productivity tools designed and built exclusively for Teradata upon Microsoft .NET 2.0. These tools greatly enhance the productivity of DBAs, developers, consultants and general users. They are the standard for Teradata usability and user-friendliness.

The latest release of this product family has been enhanced to provide support for **AtanaSuite Active Server** technology. **AtanaSuite 2008** allows users to save activities performed within many of the tools as **AtanaSuite Active Server** jobs. Users can later open these jobs using **QueueTool** and schedule them to execute via the **AtanaSuite Active Server**.

Core component improvements, Microsoft .NET 2.0 support and many major individual tool enhancements have also been incorporated into **AtanaSuite 2008**. The SQL editor, dockable window and tab page components have been improved to provide better performance and more stability throughout the product family. **CopyTool** and **MigrateTool** support for INSERT SELECT on same server operations as well as statistics definition copy and collection and a new **SchemaTool** modify dialog with intelligent table swap DDL for performing complex table alters with the click of a mouse button are a few of the individual tool enhancements included. “**AtanaSuite 2008** contains more customer requested enhancements than any previously released AtanaSuite product.” said Eric Stacy, Product Development Team Lead.

The AtanaSuite 2008 family includes the following products:

- **AtanaSuite Essential 2008** includes five tools (**QueryTool**, **JoinTool**, **SchemaTool**, **QueueTool**, **JobTool**) and two wizards (**FastLoad Wizard** and **FastExport Wizard**).
- **AtanaSuite Professional 2008** includes eight tools (**QueryTool**, **DataTool**, **SchemaTool**, **FindTool**, **DeltaTool**, **CopyTool**, **QueueTool**, **JobTool**) and two wizards (**FastLoad Wizard** and **FastExport Wizard**).
- **AtanaSuite Expert 2008** includes all the Professional features, plus four additional tools (**DependencyTool**, **ObjectTool**, **ScriptTool**, **RoleTool**) and three more wizards (**Role Wizard**, **MultiLoad Wizard** and **TPump Wizard**).
- **AtanaSuite Enterprise 2008** and **AtanaSuite Active Client 2008** include all the Expert features, plus four additional tools (**CompareTool**, **MigrateTool**, **SearchTool**, **JoinTool**) and five builders (**FastLoad Builder**, **FastExport Builder**, **MultiLoad Builder**, **TPump Builder** and **Access View Builder**).
- **AtanaSuite Active Server 2008** includes an *Active Server*, *Active Queue*, *Active Repository*, *Service Administrator* and *Job Scheduler*.
- **AtanaSuite CompressTool 2008** is the world's most advanced compression tool for Teradata and is available as an add-on product for **AtanaSuite Enterprise** and **AtanaSuite Active Client**.

“**AtanaSuite 2008** continues to make it easier for our customers to work with Teradata and be more productive.” said David Richardson, Vice President of Product Development.

Availability- All **AtanaSuite 2008** products are available for online purchase at www.atanasoft.com. Additional information for each product and the tools themselves are available from the web site.
