

Atanasoft® Introduces AtanaSuite® IntelliSQL™

Ames, IA – May 5th, 2008 - Today, in a dramatic announcement, Atanasoft® introduces AtanaSuite® IntelliSQL™, a revolutionary new capability for the AtanaSuite family of productivity products for Teradata. This new capability, which provides leading edge SQL assistance to Teradata DBAs, developers, power users, general users, consultants and data warehouse managers, *essentially renders all other SQL editors obsolete.*

AtanaSuite IntelliSQL provides dynamic, context sensitive assistance which guides the user through the process of creating or editing Teradata SQL programs with ease. The level of sophistication in this revolutionary technology is such that arcane manuals and expensive, ineffective, so-called "training guides" are no longer needed. Indeed, IntelliSQL makes expensive, out-dated training for Teradata SQL unnecessary. New AtanaSuite users can become proficient with Teradata SQL in hours instead of weeks or months. Experienced users can create new SQL programs or edit existing SQL programs in seconds instead of hours or days. IntelliSQL is your trainer, reference and personal Teradata expert on your desktop or in your notebook.

"Our new IntelliSQL technology is groundbreaking. It sets a new standard for productivity when developing or maintaining Teradata SQL. There is simply nothing else on the market like it." says Greg Hogan, AtanaSuite Development Center Team Leader, "IntelliSQL follows in the footsteps of previous AtanaSuite innovations - it is the first and only capability of its kind for Teradata users worldwide."

This new capability reinforces AtanaSuite's dominant role as the leader in the Teradata market segment. AtanaSuite is stable, mature, reliable and well supported. A vast majority of companies who evaluate AtanaSuite purchase licenses and customer retention is extremely high. "Our customers are happy. They love our products and have confidence in our proven track record of consistent support, aggressive maintenance and timely product upgrades. We love supporting our customers and maintaining quality in our products." says Nathan Sorensen, AtanaSuite Support Center Site Leader, "IntelliSQL makes our job even more enjoyable. It provides our customers with a 24x7 Teradata expert assistant to answer questions immediately. The vast majority of support requests we receive in our Support Center have to do with the subtle nature of Teradata SQL. AtanaSuite IntelliSQL will eliminate a large percentage of these requests by providing AtanaSuite users with dynamic, interactive guidance while they create or maintain SQL programs."

Eric Stacy, AtanaSuite Product Team Leader says: "IntelliSQL is a major breakthrough. For the first time, Teradata users have a personal expert at their fingertips to help them with their SQL programs - it even understands the specifics of their data warehouse! The technology behind IntelliSQL is significant and strategic in nature. We will draw upon this strong technological base to provide other astounding capabilities in future AtanaSuite products."

AtanaSuite News, Atanasoft's monthly newsletter, May 2008 edition contains a list of IntelliSQL feature highlights and links to view IntelliSQL in action. "We feel real good about this new capability. It came about through listening to our customers, careful design and lots of hard work. I am proud of the effort our Development Center put forth on this project." says Dave Richardson, Product Vice President, "It really demonstrates how sincere we are in our commitment to responding to our customers' needs. Our customers do a great job providing us feedback and we take it very seriously. This is why AtanaSuite is the best suite of productivity tools for Teradata and will continue to be the best."

Availability – Upon its release as part of AtanaSuite 2009, AtanaSuite IntelliSQL will be available to existing AtanaSuite 2008 customers with current upgrade, support & maintenance contracts.
