

Atanasoft® Announces Maintenance Update for the **AtanaSuite® 2010** Product Family

Ames, IA – January 7th, 2010 – Atanasoft announces Maintenance Update 8.1.0 for **AtanaSuite 2010**. This update represents our continuing commitment toward providing the best productivity, compression and synchronization products for Teradata. It contains many significant enhancements to the functionality of the **AtanaSuite 2010** product family, as well as addressing reported Teradata issues. This important update is available electronically to all supported **AtanaSuite 2010** customers. It is a direct result of your input through our Support Center. We thank all of you, our customers, for helping us make this update possible. Your feedback is essential for us to continuously improve AtanaSuite, the finest suite of productivity, compression and synchronization products available for Teradata!

Maintenance Update 8.1.0 for **AtanaSuite 2010** main features:

- **Database/User List Cache** – Database/User List used throughout AtanaSuite modified to provide separate database and user tabs and utilize caching mechanism to improve performance and memory utilization. Preference added to provide user selection of tabs displayed. All tools and products include this enhancement.
- **IntelliSQL** – Updates provided to enhance support for Teradata 13 command additions and changes. Virtually all tools and products are impacted by these enhancements.
- **SyncTool** – Sleep, tenacity and table lock settings added for cross server data transfer mechanisms. Impacts SyncTool and Active Server products.
- **QueryTool** – New feature, Recommend Statistics, has been implemented that provides easy statistics recommendations for editor SQL. Toolbar button and menu selection also added for this new feature. All client products include this enhancement.
- **SchemaTool** – Hash Index enhancements made to improve performance and application. Enhancement affects all client products.
- **Memory and Performance Improvements** – Detailed analysis and modifications made to improve memory utilization and improve overall application performance. All products are impacted by this enhancement.
- **Other Enhancements** – Invariant culture changes to properly handle display and application of locale settings. Many other minor fixes and enhancements. All products are impacted.

"We are pleased to make **AtanaSuite 2010** Maintenance Update 8.1.0 available to our supported customers. This update continues our commitment to providing the best support and maintenance for the most advanced suite of Teradata productivity, compression and synchronization products available anywhere." says Greg Hogan, AtanaSuite MU 8.1.0 Team Leader. "We value the input provided by you, our customers. It provides us the opportunity to improve upon the outstanding quality of AtanaSuite productivity, compression and synchronization products for Teradata."

Availability – Existing **AtanaSuite 2010** customers with current support & maintenance contracts can download the maintenance update through the Atanasoft Support Center. Additional information regarding the enhancements and fixes provided can also be found in the README files available within the Atanasoft Support Center.

About Atanasoft - Atanasoft is the worldwide leader in productivity, compression and synchronization products for Teradata. Its flagship product, **AtanaSuite**, is the world's finest suite of productivity tools available for Teradata DBAs, developers, power users, consultants, general users and data warehouse managers.
